

EZ School Lunch

EZ School Lunch is an easy-to-use, cloud-based application that facilitates the school lunch ordering process for teachers, administrators, and caterers. The solution provides accurate lunch counts and serves as a complete point of sale solution for parent preordering, online payments, and free/reduced lunch tracking. EZ School Lunch is the lowest cost solution on the market. There is no contract to sign, no commitment, and no setup cost to try EZ School Lunch today.

Parent Preorder

Parents can select and order student meals by clicking on choices for breakfast, lunch, and a la carte items. Order counts are visible to onsite food service's staff or offsite caterers to facilitate the meal planning process. Meal costs are automatically totaled and online payments can be made by Visa, Mastercard, and Discover.

Benefits:

- Food service's staff time is reduced through automated data collection
- Accurate counts result in reduced food waste
- Parents can guide students in their meal selection

Parent Payment

Parents can make payments via check, cash, or credit card into each student's meal account. Parents can view current balances and all transactions online at any time. Parents can also be automatically informed by email of low or negative balances.

Benefits:

- Staff time reduced through automatic payment calculations
- Parents have instant visibility into payment deposits
- Parents have access to all transaction history

Homeroom Preorder

Teachers can easily enter food choices for individual students in their homeroom such as breakfast, lunch, and a la carte items. Meal counts are automatically calculated in easy to run reports.

Benefits:

- Eliminates paper or email submissions of lunch counts
- Food service's staff time is reduced through automated data collection
- Accurate counts result in reduced food waste

Meal Confirmation

Pre-ordered meals are confirmed by one-click at the point of sale. This one-click confirmation is a significant time saver and provides a simple way to ensure the meal selected at the point of sale matches the preorder. Meal costs are automatically deducted from each student's account. Reports are instantly updated for enrolled free/reduced lunch participants.

Benefits:

- Easy confirmation of meal items on a laptop or touch screen tablet results in faster lunch lines
- Improved meal disbursement
- Simplified government reimbursement process through free/reduced eligibility tracking

Point of Sale

Cashiers can select breakfast, lunch, and a la carte items at the point of sale. Preordered meals are pre-populated to display at the point of sale. Items are easily selected on a laptop or touch screen tablet. Meal costs are automatically deducted from each student's account. Reports are instantly updated for enrolled free/reduced lunch participants.

Benefits:

- Easy confirmation of meal items on a laptop or touch screen tablet results in faster lunch lines
- Improved meal disbursement
- Simplified government reimbursement process through free/reduced eligibility tracking

Meal Count Report

Meal counts are automatically totaled by school, date, and homeroom with totals indicated for each meal type ordered. Counts are available to onsite food services or offsite caterers. Accurate onsite food counts assist in determining food preparation requirements. Reports for free/reduced participants are also included.

Benefits:

- Accurate counts result in reduced food waste
- Food service's staff time is reduced through automated data collection
- Reduces food service's expenses

Revenue Report

Multiple reports provide key revenue information on a daily, weekly, or monthly basis. Cash and check transactions are automatically totaled to validate bank deposits. Combined cash and credit card totals provide a total lunchroom revenue report for districts and schools.

Benefits:

- Validates accurate cash totals for bank deposits
- Provides an overall picture of the total revenue generated by lunchroom
- Food service's staff time is reduced through automated revenue calculations

System Requirements

EZ School Lunch is a cloud-based point of sale solution that only requires an internet connection and is accessible through any web browser. The application can run on any desktop, laptop, phone, or tablet device.

A barcode reader, card reader, or keypad can be used at the lunch line to speed up the selection of the individual student in the POS screen.
